 - Project management systems such as DevOps and Flow
 - Mailchimp

Jack Domleo

Web / Software Developer

PERSONAL STATEMENT

I am an energetic and enthusiastic person with experience working in a small IT team and a larger development team with experience working in an agile and waterfall environment. My present career aim is to progress in web/software development developing programs as a team and individually using services such as Microsoft Azure and Google Cloud. I enjoy a challenge and will tackle anything thrown at me. I enjoy the environment of working in IT and I find the development work interesting and satisfying. The opportunity to learn new skills and work with new technologies is particularly attractive to me.

WORK EXPERIENCE

Mitrefinch, Nottingham (& York)

Developer

May 2019 – Present

As a Developer in this software company, my responsibilities include:

- Taking the lead on the stylesheets of the redesign of Mitrefinch's products using SCSS to make the styles as simple but effective as possible.
- Learning the C# programming language
- Working in a squad on a brand new product, primarily focusing on front-end development

Junior Developer

March 2019 – May 2019

As a Junior Developer in this software company, my responsibilities include:

- Taking the lead on the stylesheets of the redesign of Mitrefinch's products using SCSS to make the styles as simple but effective as possible.
- Learning the C# programming language
- Learning to work in an agile environment

I learned new skills every day and was eager to learn more.

flybmi, East Midlands Airport

IT Developer Apprentice

Sept 2018 – Feb 2019

As an IT Developer Apprentice for this airline, my responsibilities included:

- Worked towards BCS Level 3 in Software Development
- Developed new programs from a design specification using frameworks such as Bootstrap 4, Grav CMS, Core UI and Electron JS
- Created new templates using Twig HTML that can be accessed via the Grav CMS and maintaining the content on the flybmi.com website

During my time at flybmi, I gained 6 months' worth of knowledge and experience working in the airline industry and working together with other employees to develop an end product.
